

Steel & Might — Open Ability Questions

Ability round — 2026-07-16. Every rules question from the earlier rounds is settled. These are the outstanding items from extracting the 222 non-caster abilities (13 classes) out of the Classes & Subclasses document. Many need only a one-word confirmation of a default we already implemented.

NEEDS ANSWER = no workable default; the ability stays unbuilt or manual until answered.

DEFAULT ASSUMED = we built the stated assumption; speak up only if it's wrong.

Already ruled (2026-07-13): a rest restores **ceil(tier% × max)** ability uses / pool stacks (additive, capped) — closed A2, R2, and the rest-halves of R6/W6/MK15; and **newest named list wins**, old draft bullets are dead text — closed A1, B5, B6, and the list-half of W14 (dead entries removed from the data). Only the leftover halves of those questions appear below.

Conqueror (C&S pp.35–41)

A3 **Energy maximum** **DEFAULT ASSUMED**

Maneuver prose says "maximum of 150 Energy", but the class table says 10→120 by level (and carries the author note "MAYBE DECREASE ENERGY OVER LEVELS"). Per the tables-beat-prose ruling we use the table — confirm.

ASSUMPTION: table (10→120), already live.

Answer: _____

A4 **Combat Training under the card deck** **NEEDS ANSWER**

Combat Training raises *skill thresholds* (+5 to Lifting/Athletics/Reflex/Intimidation, or +15 to one of them) — but thresholds belong to the pre-deck skill system. What does this become under the card deck: an extra redraw, a deck modification, or deferred like the racial skills?

CURRENTLY: excluded from the data entirely.

Answer: _____

A5 Combat Styles — auto-wiring **DEFAULT ASSUMED**

Combat Styles are permanent passive picks that modify combat math (Destruction crit-range +1, Evasive +2 AC, Duelist +level damage one-handed, Agile full off-hand modifier, Precision push save, Obstruction taunted on hit). OK to auto-wire the mechanically encodable ones (crit range, AC, flat damage) and leave the situational ones to the DM?

ASSUMPTION: shown as passives on the sheet, no automatic math yet.

Answer: _____

A6 Adrenaline's AP crash **DEFAULT ASSUMED**

"Start your next turn with 3 fewer AP" — implemented as a 1-round self-effect that reduces AP recovery by 3 on the next turn start. Correct?

ASSUMPTION: yes (charged AP-recovery -3 effect).

Answer: _____

Barbarian (C&S pp.27–32)

B1 Fury Pool abilities — AP cost **DEFAULT ASSUMED**

The Fury Pool abilities have no stated AP cost.

ASSUMPTION: 0 AP (the Raging Attacks header says "all cost 0 ap").

Answer: _____

B2 Does activating Rage spend a rage use? **DEFAULT ASSUMED**

The Rage text never says "expend a rage use". Also, Killing Spree's automatic rage is modeled as free.

ASSUMPTION: Rage costs 1 use of the *rages* resource; Killing Spree's auto-rage is free.

Answer: _____

B3 Raging Attacks (1) — unlock level **DEFAULT ASSUMED**

The unlock level is missing from the class table (text only, p.31).

ASSUMPTION: level 4.

Answer: _____

B4 Frenzy Instincts (Medium) — unlock level

DEFAULT ASSUMED

The unlock level is missing from the class table.

ASSUMPTION: level 8.

Answer: _____

B8 Rampart — PA scaling

DEFAULT ASSUMED

"2 MA and half as much PA, MA +3/level beyond 2" — does PA equal ceil(half of the *scaled* MA), or is it a fixed 1?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

B9 Power Blow / Earthquake Smash — save DC

DEFAULT ASSUMED

Both call for a save but state no DC.

ASSUMPTION: 8 + proficiency + STR modifier.

Answer: _____

B10 Defy Death — two details

DEFAULT ASSUMED

(a) What is "your killer's might" in the DC [might + 8] — the monster-level might from N2? **(b)** Does damage-over-time bypass the post-revival immunity ("loses the effect after burning, poison, etc.")?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

B11 Bloodlust vs Bloodlust (Alternative)

DEFAULT ASSUMED

The text recommends the original — is the alternative version selectable at all?

ASSUMPTION: both included as options.

Answer: _____

B12 Dice fury costs **DEFAULT ASSUMED**

Costs like 1d4 / 2+1d4 / 4+1d4 fury: the server rolls the d4 at spend time — so a bad roll can push fury negative and trigger the disaster rule. Intended?

ASSUMPTION: yes.

Answer: _____

B13 "Vampiris slashes" spelling **DEFAULT ASSUMED**

Kept as printed in the source — should it be "Vampiric"?

ASSUMPTION: kept as source.

Answer: _____

B14 Ravaging Fury — rage cost **DEFAULT ASSUMED**

The reaction rage is assumed to consume 1 rage use.

ASSUMPTION: yes.

Answer: _____

B15 Rage modeling **DEFAULT ASSUMED**

Rage's self-buff is modeled as *physical-resistance* for 3 rounds; the advantage/AC/damage components stay narrative; Killing Spree's duration extension is managed from the table. Confirm.

ASSUMPTION: as modeled.

Answer: _____

Shapeshifter (C&S pp.20–23)

S1 Animal system — Offensive Might caps & stat blocks **NEEDS ANSWER**

The class table's "Shapeshift Max Offensive Might" column came out garbled in extraction (L1 "20", L2–19 all "1/4"). We need the real per-level caps **and** the animal Offensive Might scale / stat blocks they gate. **This blocks the whole Shapeshifter class** — the animal system is currently undefined.

Answer: _____

S2 Transform AP cost & animal-form capabilities**DEFAULT ASSUMED**

The AP cost to transform in/out is unstated, and animal-form capabilities aren't described in this section.

ASSUMPTION: resolved manually at the table for now.

Answer: _____

S3 Shapeshift duration & Primal Regeneration under the single rest**NEEDS ANSWER**

Shapeshift lasts "1 cumulated hour between LONG rests" (4 h at L8), and Primal Regeneration gives "double healing from SHORT rests" — but short/long rests no longer exist. How do these map onto the single tiered rest?

Answer: _____

S4 "Recharge 5" / "recharge 6"**DEFAULT ASSUMED**

Several adaptations carry "recharge 5" or "recharge 6", but recharge is never defined — is it a die-roll recharge (roll each round, recharges on N+) or an N-round cooldown?

ASSUMPTION: stored verbatim in the data, not yet implemented.

Answer: _____

S5 Minor adaptations — 2 of 5 or 2 of 6?**DEFAULT ASSUMED**

The prose lists **six** options, but the table says "(1/5)". Choose 2 of 5, or 2 of 6?

ASSUMPTION: all six included as options.

Answer: _____

S6 Scaling & Tentacle damage**DEFAULT ASSUMED**

Confirm "+4/level" means a flat $4 \times \text{level}$; and that Tentacle's flat, non-scaling damage $([5 \times \text{STR} + 40 + 5d8])$ plus $[16d8]$ lightning) is intended as written.

ASSUMPTION: as written.

Answer: _____

S7 Shapeshift-HP pool refill **DEFAULT ASSUMED**

Does the shapeshift-HP pool refill fully on any rest, tiered like other resources, or only on reverting to normal form? Does Metamorph double only the maximum? (Extra picks per group at L20 also needs a pick-count mechanic.)

ASSUMPTION: refills on rest (tier-scaled like everything else).

Answer: _____

S8 Save-or-condition adaptations vs the stack system **DEFAULT ASSUMED**

These adaptations give **durations**, not stacks (web: "rooted for the turn"; medusa: "petrified for a round"...). How do they translate to stack counts under the threshold system — or do they bypass it as direct-duration effects?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

S9 Adaptations in normal form **NEEDS ANSWER**

Do adaptations also work while untransformed? (Predatory Assault implies yes.)

Answer: _____

Monk path — Shaolin / Martyr / Hierophant (C&S pp.42–52)

MK1 Shaolin fist damage — table vs prose **DEFAULT ASSUMED**

The table says $1d4 + \text{mod} + 7$, +1 at L2, then +3/level; the prose says $\text{mod} + 8 + 1d4$, +1/level. Which is right? (Fist scaling needs engine support and is currently excluded from the data.)

ASSUMPTION: the table (per the tables-beat-prose ruling).

Answer: _____

MK2 Iron Elbow — Wounded dice **DEFAULT ASSUMED**

"3d6 Wounded... +1d6 per level" — is that (level+1)d6, rolled per application, lasting until the start of your next turn?

ASSUMPTION: yes.

Answer: _____

MK3 Step of the Wind — AP cost **DEFAULT ASSUMED**

No AP cost is stated.

ASSUMPTION: 0 AP.

Answer: _____

MK4 Defensive Arts — DC & reaction **DEFAULT ASSUMED**

The DC "8 + enemy's attack bonus value" is non-standard — confirm it's intended. Does it consume the reaction in both modes?

ASSUMPTION: as written; reaction consumed in both modes.

Answer: _____

MK5 Grandmaster Techniques **DEFAULT ASSUMED**

All three known at L16 (there's no choose-one wording)? Also, Fists of Power's "true damage 3 rounds" needs an effect definition.

ASSUMPTION: all three known.

Answer: _____

MK6 Chakra Master **DEFAULT ASSUMED**

Is the L20 maximum 60 (the table's 30, doubled)? Is the cleanse cost 1 flat for non-spell effects and X for an Xth-level spell effect? The AP cost is unstated.

ASSUMPTION: as modeled (60 max; 1 / spell-level costs).

Answer: _____

MK7 Focus economy **NEEDS ANSWER**

Focus builds +10/turn (20 at L14, doubled again by Focus Deity), +15 when taking damage, -5 on crowd control. Is it uncapped? Does it reset at combat start or end? Is the -5 per CC application or per turn? (This defines the engine support we build.)

CURRENTLY: modeled as an uncapped builder.

Answer: _____

MK8 Basics standalone — 3 AP rule **DEFAULT ASSUMED**

The blanket "3 AP standalone / 0 AP as rider" rule conflicts with the specific printed AP costs — we used the specific costs. Can basics still be used standalone at 3 AP?

ASSUMPTION: specific printed costs win.

Answer: _____

MK9 Two effect mappings **DEFAULT ASSUMED**

"Halve MS next turn" has no matching effect (nearest is *snared*); "-1 AP next attack" was mapped to *reduced-weapon-ap-cost*. OK?

ASSUMPTION: mapped as stated.

Answer: _____

MK10 Shadow Conversion — "frightened" **DEFAULT ASSUMED**

Mapped to *terrified* for 1 round?

ASSUMPTION: yes.

Answer: _____

MK11 Eye of the Mind techniques **DEFAULT ASSUMED**

Modeled as separate 0-cost entries usable only while the Eye is active, once each per activation? Immaterial Form mapped to *ethereal*?

ASSUMPTION: yes to both.

Answer: _____

MK12 Unleash the Martyrs **NEEDS ANSWER**

First use per rest is free — confirm. The channel's AP cost is unstated. And is the 26d10 dealt **once per channel turn** or once total?

Answer: _____

MK13 Sacred Hand **DEFAULT ASSUMED**

Do the WILL milestones apply to the Integrated version too? The pool prose says "300×level" but the table says 150...6000.

ASSUMPTION: the table (per the tables-beat-prose ruling).

Answer: _____

MK14 Numinous Strikes **DEFAULT ASSUMED**

$(2 \times \text{level} - 3)d4$ true damage plus the ally-HP $\times 2 / \times 0.5$ modifier is an always-on rider that needs engine support — currently excluded from the data. Confirm the rule so we build it once.

CURRENTLY: excluded.

Answer: _____

MK15 Group heal — cost details **NEEDS ANSWER**

(The per-rest part was ruled 2026-07-13.) Still open: the worked example in the text looks stale against the current formula — is it? And is the sacred-energy cost exactly $2 \times$ the single-target heal per tick?

Answer: _____

MK16 Cleansing Hand **DEFAULT ASSUMED**

Mappings like "knocked down" → *prone* assumed. Does "other unknown effects" mean **literally anything** for 1000 SE + a Medicine check?

ASSUMPTION: mapped; "anything" as written.

Answer: _____

MK17 Sacramental Renewal — percentage costs **NEEDS ANSWER**

Its costs are a **percentage of maximum sacred energy** — a cost type the engine doesn't support yet. Confirm the percentages and how they interact with the out-of-combat cost multiplier before we build it.

Answer: _____

MK18 **Martyr manoeuvre names** **DEFAULT ASSUMED**

The source bullets are unnamed, so the data uses provisional names — confirm them or supply official ones.

ASSUMPTION: provisional names stand until renamed.

Answer: _____

Archer path — Marksman / Hunter (C&S pp.53–54, 59–62)

AR1 **Tactical Retreat — uses** **DEFAULT ASSUMED**

"Resets on ranged crit" — how many base uses, and per what window (turn, combat, rest)?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

AR2 **Eagle Eye & Sky Shots** **DEFAULT ASSUMED**

Their full text lies outside pp.53–54 (the marksman section jumps to p.59) — confirm the rules, AP costs, and rest mapping.

ASSUMPTION: modeled from the summary text only.

Answer: _____

AR3 **Hunter animal companion — missing table** **NEEDS ANSWER**

The companion table (stats, abilities, flee thresholds, the Bait Trap DC components) is not in this section. Where does it live? **This blocks the Hunter's companion mechanics.**

Answer: _____

AR4 **Hunter table — duplicate "Trap upgrade (2)"** **NEEDS ANSWER**

"Trap upgrade (2)" appears at **both** L10 and L13 — typo? What should L13 actually be?

Answer: _____

AR5 Linked Souls — DC formula **NEEDS ANSWER**

The DC "[8 + killer's might/level]" — is that might *divided by* level, or "might *or* level"?

Answer: _____

AR6 Trap conditions vs the stack system **DEFAULT ASSUMED**

Trap conditions read as binary save-ends effects — how do they map to stack counts under the threshold system?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

AR7 Blink Trap — placement **NEEDS ANSWER**

1 AP per placement (2 total) — is that one action? Does the pair count as 2 traps against any trap limit?

Answer: _____

AR8 Spirit Animal — whistle cost **DEFAULT ASSUMED**

The whistle summon has no stated cost.

ASSUMPTION: resolved manually at the table for now.

Answer: _____

Rogue path — Assassin / Burglar (C&S pp.63–68)

R1 Unseen Blade — table vs Slice formula **NEEDS ANSWER**

The assassin table shows "Unseen blade (9d10/12d10/16d10)" at L12/16/20, while Slice's prose formula is $((\text{level}-2) \times 2 + 1)d6$. Tables beat prose — do the d10 values **replace** the formula at those breakpoints? And does that apply only to Slice?

Answer: _____

R3 "Roll 1d5" NEEDS ANSWER

How is a d5 rolled in the d10 system — $\text{ceil}(d10 \div 2)$?

Answer: _____

R4 Sneak Attack / Backstab wiring DEFAULT ASSUMED

Modeled as manual attack-enhancer toggles on the weapon attack: the server adds $\text{ceil}(\text{level}/2)d4$ or d8, and the player declares when the tripling trigger applies. OK?

ASSUMPTION: yes.

Answer: _____

R5 Backstab — frequency NEEDS ANSWER

"Once per attack (even with 2 weapons)" — once per **attack action**, or once per **turn**?

Answer: _____

R6 Evasion uses — two leftovers NEEDS ANSWER

(The per-rest regain was ruled 2026-07-13.) Still open: **(a)** with DEX modifier ≤ 0 , is there a minimum of 1 use? **(b)** Is the bracketed "[your ac is increased by your proficiency as well.]" a real rule or an editing leftover?

Answer: _____

R7 Sabotage — "sleight of hand check" DEFAULT ASSUMED

Sleight of Hand isn't one of the 19 skills — it means Thievery?

ASSUMPTION: Thievery.

Answer: _____

R8 Sabotage — use limit window NEEDS ANSWER

"DEX modifier times on any given target" — per combat, per day, or ever?

Answer: _____

R9 Two effect mappings **DEFAULT ASSUMED**

"Revealed" (cannot stealth or turn invisible) has no effect definition; Fatal Fixation's "Exposed (advantage against you)" was mapped to the existing *exposed*.

ASSUMPTION: mapped as stated; "revealed" pending a definition.

Answer: _____

R10 Assassin L10 contents **DEFAULT ASSUMED**

The table says "Swift Presence Cut tongue"; the prose says Quick On Thy Feet. Modeled L10 = Quick On Thy Feet + Cut Tongue (matching class-abilities.json). Correct?

ASSUMPTION: yes.

Answer: _____

R11 Break Magic — AP cost **DEFAULT ASSUMED**

No AP cost is stated.

ASSUMPTION: none recorded (free) until specified.

Answer: _____

R12 Noxious Cut **DEFAULT ASSUMED**

Envenomed value = a $((\text{level}-2)\times 2+1)$ d4 roll, and "1 minute" = 6 rounds?

ASSUMPTION: yes to both.

Answer: _____

Wraith Hunter path — Runekeeper / Tormentor / Phantom (C&S pp.91–105)

W1 Primordial Runes — pick & prepare **NEEDS ANSWER**

Pick 4 of 7 at L2, prepare a maximum of 2 per rest (all prepared at L20) — this needs a pick-N + prepared-subset mechanic the engine doesn't have. Confirm the design so we build it once.

Answer: _____

W2 Rune actives — conditional recharges **DEFAULT ASSUMED**

They recharge on **conditions** (damage 5 creatures, get a kill, spend 6 AP of movement, hide for 2 turns...) which the server can't track; the Fire and Power actives also have no AP cost.

ASSUMPTION: resolved manually at the table for now.

Answer: _____

W3 Barrier rune **NEEDS ANSWER**

The 3d6/level shield — is it temporary HP? Its duration is unstated.

Answer: _____

W4 Curses — resource model **DEFAULT ASSUMED**

Curses are modeled as a **per-rest casting resource** matching the table (2→8), not a maximum-simultaneous cap. Correct?

ASSUMPTION: per-rest resource.

Answer: _____

W5 Mark of the Challenger **NEEDS ANSWER**

The heal "equal to its max HP" — capped at your own maximum? And is $[2d8 \times \text{level}]$ one 2d8 roll multiplied by level, or 2d8 rolled per level?

Answer: _____

W6 Tribe oils — availability **NEEDS ANSWER**

(The per-rest regain was ruled 2026-07-13.) Still open: can **any** tribe's oil be used, or only tribes the character has slain?

Answer: _____

W7 Lesser demon aura scaling **NEEDS ANSWER**

"Increases to $2d12+2d12$ at 5/9/13/17" — is that +1d12 per threshold, or does it **double** (class-abilities.json says doubles)?

Answer: _____

W8 Lesser abomination — advantage antecedent **NEEDS ANSWER**

"Advantage vs creatures damaged by one of THEM last round" — who is "them": the abominations, any of your summons, or you?

Answer: _____

W9 Lesser undead — "remain at 1 HP" **DEFAULT ASSUMED**

The CON save (DC 5, +5 per use) to remain at 1 HP — how does it interact with death stacks, and when does the DC reset?

ASSUMPTION: resolved manually at the table for now.

Answer: _____

W10 Mark of the Stalker **NEEDS ANSWER**

"Attacks that use the range cannot miss" — weapon attacks only? Can they still crit?

Answer: _____

W11 Power Absorption (3) **DEFAULT ASSUMED**

The ability is gated on **which** greater creature you kill, but no kill-tracking exists. Can multiple absorptions be held at once?

ASSUMPTION: a free-form picker; the player selects what they've absorbed.

Answer: _____

W12 Ethereal Form **DEFAULT ASSUMED**

Auto-mapped to the existing *ethereal* effect; the per-turn transform counting and the "attacked in both forms" rebate stay manual. OK?

ASSUMPTION: yes.

Answer: _____

W13 Advanced oil additives **DEFAULT ASSUMED**

Modeled as O-AP add-ons to the 1-AP basic oil — the total application stays 1 AP?

ASSUMPTION: yes.

Answer: _____

W14 Duality — Ethereal half cost **NEEDS ANSWER**

(The duplicate-list part was ruled 2026-07-13 — p.102 stands.) Still open: does the **Ethereal half** of a Duality cost energy?

Answer: _____

W15 Duality Verdict vs Vital Strike **DEFAULT ASSUMED**

Duality Verdict (tier 1, 10 energy) and Vital Strike (tier 2, 30 energy) are near-identical — intentional?

ASSUMPTION: both included as written.

Answer: _____

W16 Stances — switch costs **DEFAULT ASSUMED**

Entering from normal form is free; early stance→stance costs 25% and stance→normal 50% of total energy — confirm. Does Spiritbane's doubling apply to switch costs? Does Bloodthirst force swapping forms every turn?

ASSUMPTION: as modeled.

Answer: _____

W17 Spirit Banish **DEFAULT ASSUMED**

The plane banishment has no server-side model.

ASSUMPTION: resolved manually at the table / DM narrated.

Answer: _____
